

BVRN

If you want to shine like a sun,
first burn like a sun.

A. P. J. Abdul Kalam

Introduction

The **BVRN (BRN)** project is a community managed experiment in which a highly deflationary token will be tested in the ever evolving cryptocurrency market.

Spontaneous community building will be the basis of our society in the coming years. A strong foundation can only be achieved when thousands of people gather together with a common goal in mind.

Because we believe in the **KISS (Keep It Simple Stupid)** philosophy, this project has been built as straightforward as possible. No rear doors, no secrets held, just straight to the point facts.

Project

- Deflationary ERC20 token that burns itself each transaction
- Built on the Harmony Network to virtually remove gas fees
- A portion of the total supply (up to 70%) will be periodically burnt. This process will be managed by the community

Tokenomics

Total Supply

1,000,000,000,000
(1 trillion) BRN Tokens

Harmony Network

Deployed on the
Harmony Network to
virtually remove gas
fees

Transaction Burn

Each transaction burns
10% of its value. This
amount is managed by
the community

Burn Reservoir

70% of the total supply
is reserved for the
burn process

Liquidity

25% of the total supply
seeded as liquidity

Dev + Marketing

5% of the total supply is
reserved for
development and
marketing
